

PRESS RELEASE

ROOS IT completes SAP® project with STADA successfully

Global rollout of SAP® SuccessFactors® Employee Central at STADA Arzneimittel AG

Bielefeld/Aachen - After a 12-month runtime, the rollout of SAP® SuccessFactors® Employee Central at STADA Arzneimittel AG has been completed successfully. The SAP® Silver Partner ROOS IT, based in Aachen and Bielefeld, was in action as the project partner, in charge of customer support in integrating third-party systems.

The SAP® Silver Partner ROOS IT, based in Aachen and Bielefeld, was used as project partner for customer support in the area of integration of third-party systems. ROOS IT was also responsible for the design of the integration architecture and assisted in finding the ideal technical solutions for the subsidiaries of the global operating producer of pharmaceuticals with 12000 employees.

From the preparation and support of the SAP® Successfactor® Employee Central integration test to the local payroll system, ROOS IT continues to provide hyper-care support for the first three pay runs. Additionally, the existing MS Active Directory integration has been redesigned within the scope of the project and automatically integrated into the HR processes with the help of MS Azure. This helped to reduce the support effort for this interface drastically.

PRESS RELEASE

About ROOS IT GmbH & Co. KG

Founded in 2012 by computer scientist Andreas Lennartz and engineer Axel Krausen, ROOS IT GmbH & Co. KG is a SAP® consulting company specialized on the digitalization of HR processes. The consultants are all experts in the areas of SAP® SuccessFactors®, Fiori, Screen Personas, and the Business Technology Platform. In addition, the company can rely on a portfolio of internally developed Self-Service apps.

ROOS IT has been a certified SAP® Silver Partner since 2016.
